Abstract (en)
[origin: WO2012131190A2] The invention relates to an alarm triggering device (200) for a security system (10), said alarm triggering device (200) comprising an interface (210) arranged so as to connect the alarm triggering device (200) to a central monitoring station (100) of the security system (10) by means of a wireless connection (50); means (220) for triggering an alarm in the case of detection of a pre-determined event; supply means (230) for enabling the power supply of the alarm triggering system from a supply source; defect detection means (240) for detecting an operating defect of the triggering device; and signaling means (250) for signaling, to the alarm triggering device (200), the operating defect of the alarm triggering device (200).
