Abstract (en)

The drier has a rotatably supported drum (10) comprising a drum body (11) and stroke shovels (13), where the shovels are arranged at the drum body. The stroke shovels are adjustable relative to the drum body and pivotable around a pivot axis (15) that runs parallel to a rotational axis of the drum. The stroke shovels comprise a bendable edge portion at a free end. A ring-shaped adjusting device (19) stays in effective connection with the stroke shovels, where a pivot axis of the edge portion is oriented parallel to the pivot axis of the stroke shovels.
