Abstract (en)
[origin: EP2679115A1] The furniture has a chassis fixed at side parts of a body (1). Two articulation points of ends of articulated arms are arranged opposite to each other in relation to a front end of a seat part (2). One of the articulation points is located remotely from a rear end of a swiveling foot rest (4) such that the foot rest is horizontally aligned in a pivoted position, displaced over a vertical plane in a retracted position upto contact with the articulated arms and encloses an acute angle from 30 degrees to 50 degrees with the vertical plane. The foot rest is designed as a wide board.
