Abstract (en)

[origin: EP2679712A1] The arrangement (1) has a fall plate (2) extending parallel to a displacement direction (3), and a fall plate drive (7) for driving the fall plate in a movement direction (4) vertically to the displacement direction. The fall plate drive is arranged in the displacement direction adjacent to the fall plate, and has a drive element that is moved in the displacement direction, where the drive element works on the fall plate over a slot (8), a pin (9) and a roller (10). The fall plate has a front side and a rear side, where the fall plate lies at supporting plates (5, 6) with one of the sides.
