Abstract (en)
[origin: EP2679737A2] The element has a pressure force reinforcement element (3) including convexly curved transverse force projections (6a, 6b) in upper and/or lower sub regions of front sides (4a, 4b). A curvature of the projections is designed with a circular arc radius in an approximately circular arc shape in a horizontal section in an installed condition. Center points of the arc radius of the curvature of the projections correspond to center points of a circular arc radius of a curvature of convexly curved contact profiles (5a, 5b) for forming a joint connection with a building and a projecting outer part.
