Abstract (en)
[origin: EP2680091A1] The watch (1) has a movement (10) that drives a main display unit (2) cooperates with a complementary main display unit (3). Adjusting unit (4) adjusts unit to set time of determined place, and secondary display unit (5) which is moveable relative to unit. Movement drives synchronously with both display units. Carrier structure (7) carries screens (8) superposed on geographical reference point based on time of day and changing position under action of drive torque from drive unit (9) which is greater than resistant torque imparted by friction unit (11) connected to structure.
