Abstract (en)

[origin: WO2011131474A2] Cosmetic or dermatological skincare and skin-calming deodorant or antiperspirant compositions, comprising at least one active deodorant or antiperspirant ingredient and at least one substituted cyclohexanol, can be boosted in their performance when they comprise at least one deodorant adjuvant from the groups of the silver salts and/or silver complexes and/or minerals of volcanic origin and/or zeolites and/or alum and/or active hair-growth inhibitor ingredients. Even over long storage times, these materials develop a skin-calming and caring action, without any detracting effect from the care effect mediated by active deodorant and antiperspirant ingredients.
