Abstract (en)
[origin: WO2012116838A1] The invention relates to a machine tool separating device, in particular a handheld machine tool separating device, having at least one cutting strand (12a; 12b) and having at least one guide unit (14a; 14b). According to the invention, the guide unit (14a; 14b) has at least one segmented guide element (16a, 18a, 20a, 22a; 16b, 22b) for guiding the cutting strand (12a; 12b), which element is provided to limit a movement of the cutting strand (12a; 12b), viewed in a direction facing away from the guide unit (14a; 14b), at least along a direction (24a, 26a; 24b, 26b) running at least substantially parallel to a cutting plane of the cutting strand (12a; 12b).
