Abstract (en)
[origin: WO2012119607A1] The invention relates to a package (1) for smoking articles comprising a first receptacle (100) for smoking articles and second receptacle (200) for smoking articles and a lid (300) for closing the first and the second receptacle from the top side hingedly connected to the second receptacle. The first and the second receptacle are hingedly coupled at a bottom side. The first and the second receptacle are coupled at a longitudinal side by a first and a second foldable flap (402, 403) configured to swivel the second receptacle away from the first receptacle when the lid is open.
