Abstract (en)

[origin: EP2682190A1] The unit has two parallel retaining plates (2) comprising an assembly of a holding unit for holding multiple cover vessels. The cover vessels include a tubular vessel and a closure element that projects in a radial and outward manner with respect to the vessel. Two groups (14.1, 14.2) of cover vessel parts (3.1) are held parallel to each other by holding units (11.2) of the retaining plates. One of the groups of the cover vessel parts of is aligned and reciprocally arranged opposite to one another to the other group of the cover vessel parts. An independent claim is also included for a working unit.
