Abstract (en)

[origin: EP2682344A1] The method involves filling a wrapping structure with packaging material (5). A planar inlay (6) is inserted into the wrapping structure. The stapling tabs (8) of the planar inlay are aligned parallel to side walls (4) of the wrapping structure. The position of the inlay in the wrapping structure is detected. A stapling tool (12) is positioned based on the detected position of the inlay at the outer side of the side walls of the wrapping structure above the stapling tabs. The stapling tool is activated for fastening the stapling tabs at the side walls. An independent claim is included for a cardboard wrapping structure.
