Abstract (en)

[origin: EP2682352A1] The arrangement has pads (32, 34) that are arranged in two stacks such that the pads of the stacks overlap in a partial region. Each pad of the stacks includes a material cut-out (50) at an edge in order to form a gripping aid. The pads of one stack and the pads of another stack are oriented in portions, such that the material cut-outs of the one pad of the former stack and the material cut-out of another pads of the stack jointly define the partial region. A packaging container comprises a base surface (44) for setting up the stacks.
