Abstract (en)

[origin: EP2682524A2] The wall has a noise protection wall element (25) that is set with carrying devices (27) mounted at carriers (24,24'). One end (26,26') of carrier is set with main joint portion and is tilted along a horizontal track-parallel pivotal axis (29). Another end of carrier is set with auxiliary joint portion (28,28') and is arranged along a horizontal track-parallel rotational axis (35,35'). The pivotal axis and rotational axis are removed parallel to each other. The noise protection wall element is arranged in a vertical position at track region by auxiliary joint portion.
