Abstract (en)

[origin: EP2682545A1] The assembly (1) has a bearing element (2) fastened at a sliding wing, a fixed lining or a fixed field of a sliding door or a sliding window. A transverse slider (7) moveably arranged at the bearing element. The transverse slider comprises a control element (10) i.e. curve shaped control contour such as link- or control groove, which is coated with an actuator device i.e. driving bar fitting, of the sliding door or sliding window in a mounted state of the closure assembly. The control element includes two closure elements (11, 12) e.g. latch pins and close pieces. An independent claim is also included for a sliding door or sliding window.
