Abstract (en)

[origin: EP2682681A2] The device (1) has a wall console (2) comprising a retaining device (4) and a retaining console (3), where the retaining console is height-adjustable opposite to the wall console by a rotatably supported threaded spindle (16). The retaining console has a downholder (15) that encloses a retaining latch or an edge of a panel-shaped heating body. The wall console has a positioning element (5) that stays in contact with the heating body in a force-fit and/or form-fit manner. The positioning element is made from plastic, and has two straight sections that are arranged parallel to each other.
