Abstract (en)

[origin: WO2012120205A1] The invention relates to the field of jewellery, especially to devices for storing jewellery. The device according to the invention is a device (1) for storing valuable objects (10), especially jewellery, comprising a hollow storage means and a means (3) for manipulating said storage means. Said storage means (3) consists of two half-shells (4a, 4b), each one having at least one concave face with coincident edges, and said manipulation means consists of a means (12) for remotely controlling said elements (4a, 4b) in such a way that they spread apart from each other, providing access to the content of said storage means.
