Abstract (en)

[origin: WO2012123646A1] The invention relates to a method for renovating a first elevator of a bank of elevators arranged in a common elevator hoistway, including first (55b1) and second (54b1; 56b') adjacent shafts, the first shaft accommodating the first elevator (5b1), wherein a second elevator (4b1; 6b') is provided in the second shaft, the second shaft comprising an intermediate unserved area (14). The method includes placing a car (15) of the first elevator outside the intermediate area (14), and installing a backup elevator (24) in the first shaft (55b1).
