Abstract (en)

[origin: WO2012119653A1] The invention relates to a process for making crystalline linezolid Form A, comprising a step of dissolving linezolid in an organic solvent at a temperature of at least 80°C to obtain a solution followed by a step of precipitation, said step preferably comprising adding, upon maintaining the temperature of at least 80°C, an antisolvent to said solution in an amount sufficient to induce precipitation of linezolid.
