Abstract (en)  
[origin: WO2012119601A2] The invention relates to a vibrating arrangement (1) comprising: at least one elongate silo tube (110) for receiving filling material, which has a longitudinal direction (111), a lengthwise filling material outlet at one end of the silo tube (110) and a casing; at least one vibrator which is disposed on the silo tube (110); at least one outer closure (150) disposed on the casing of the silo tube (110); and at least one filling material container (200) disposed so as to be movable along the longitudinal axis of the silo tube (110) before the outer closures (150), wherein the filling material container (200) has at least one opening (240) facing the casing of the silo tube (110).
