Abstract (en)

[origin: WO2012125393A2] The present invention is directed to processes and systems that use wave energy to drive one or more air turbines associated with an offshore facility, wherein such turbines can generate electrical power for use on the offshore facility and/or adjacent facilities and equipment. The offshore facility can be an offshore platform or a floating vessel. The turbine can be housed within a structural member of the facility or a tubular member suspended from the facility. The turbine can also be housed within a tubular member connected to a structural member of the facility.
