Abstract (en)

[origin: WO2013174358A1] The present invention presents a novel device (1) for screening direct insolation, in particular in the field of view of the driver of a vehicle. Said device is arranged in the form of a constructional unit of very flat design between the motor vehicle roof lining (12) and the roof (13), wherein the sun visor (2) is moved by a drive element (7) which is accommodated on a mounting plate (4) or the like.
