Abstract (en)

[origin: WO2012123474A1] The invention relates to a method for setting an electrically locally set switch (1). According to the invention, a switch setting command referring to the electrically locally set switch (1) is received by a switch controller (2), the speed of a vehicle (10) approaching the electrically locally set switch (1) from the pointed side of the electrically locally set switch is determined, and the electrically locally set switch (1) is set by the switch controller (2) according to the received switch setting command, provided the speed of the vehicle (10) does not exceed a permissible maximum speed. The invention further relates to a device for setting an electrically locally set switch (1).
