Abstract (en)

[origin: WO2012127201A1] A pile guide (10) for supporting a pile as it is driven into a substrate (20) comprises a base frame (12) having a substrate-engaging surface (14) and a plurality of pile guide members (16) coupled to a support frame (18), each pile guide member being configured to guide a pile in a respective predetermined direction therethrough as it is driven into the substrate. The support frame (18) is mounted on the base frame (12) via a support arrangement (22) configured to permit pivotal movement of the support frame relative to the base frame about a first axis of rotation (R1).
