Abstract (en)

[origin: WO2012123672A2] The invention relates to an assembly comprising a supporting frame and a reversible anti-fall safety grid that can be mounted on either of the two opposing sides of the frame in an articulated manner. According to the invention, the safety grid (7) is characterised in that it can be mounted on either of the two opposing sides (2b, 2c) of the frame (2). The invention is applicable in the field of transport infrastructure.
