Abstract (en)

[origin: WO2012123183A1] The invention relates to a safety cabinet, in particular a hazardous material cabinet, for storing preferably liquid hazardous materials, having a cabinet body (3), further having at least one cabinet door (4), and at least one latching element (8) for the cabinet door (4). According to the invention, the latching element (8) is returned to the latched position after having switched to the unlatched position thereof, taking a preselectable time delay and/or a preselectable point in time into consideration.
