Abstract (en)
[origin: EP2687651A2] The method involves preparing a component from wood, attaching a connecting element that comprises engagement element against the surface of the component through an anchoring element (3). The surface of the component is located opposite to the anchoring element that is provided within the anchored component. The component hooking the connecting element is added and the component is attached to other elements or structures by connecting element. Independent claims are included for the following: (1) a structure for adjusting and/or fixing components; and (2) a kit for adjusting and/or fixing components.
