Abstract (en)
[origin: EP2687654A2] The present invention relates to a handle configuration (I; II; III; IV; V; VI) for a vehicle door (2) provided with an interior closing handle (10; 110; 210; 310; 410; 510) for operating said vehicle door (2), which door (2) is provided with operating means for causing an opening mechanism to put the door into an openable state, characterised in that said operating means comprises a lever arm element (22; 122; 222; 322; 422; 522) suspended for articulation relative to said closing handle (10; 110; 210; 310; 410; 510) and adapted to being gripped at the same time as said closing handle (10; 110; 210; 310; 410; 510) in order to actuate a link configuration (132; 222b, 232; 332, 334; 432, 434; 522b, 532) which is situated in the closing handle and is part of said opening mechanism. The present invention relates also to a vehicle door and a vehicle.
