Abstract (en)
[origin: WO2012083924A2] The invention relates to a motor vehicle lock, comprising a lock housing, a lock case, a locking mechanism and an operating device, wherein at least one component of the operating device extends through an opening in the lock housing and said opening is designed with at least one reinforcing insert. The main area of the plate or the metal sheet from which the lock case is made is basically relatively large. In light of this, it has proved advantageous to form the reinforcing insert from the lock case. Waste is thus avoided.
