Abstract (en)

[origin: EP2687786A2] An assembly (100) of a door hinge (50) of an oven of a household appliance with damped closing of the oven from an ajar position to a final closed position of the door consists of a door hinge arranged in the door of the oven, a support housing (60) of the oven arranged on the inner side of the external wall of the housing of the oven, and a damper (70), wherein an oblong recess (6) is formed on lateral parts of the housing, inside of which recess there is a freely movable limiting bolt (18) that is fixedly arranged on a two-leg connecting member (9) in the area of the beak-shaped holder (4). The longer leg of the beak-shaped holder (4) is provided with a longitudinal through guide hole (15), in which an abutting bolt (17) is arranged. When the door of the oven is in an ajar position, the abutting bolt (17) abuts on the damper (70) coaxially arranged on the support housing.
