Abstract (en)  
[origin: EP2688364A1] The hob device has a heating unit (12) and a control unit that is provided in operating state in which the position parameter for the cooking containers (16, 18) is provided as a function of optimization parameter. The control unit provides a choice of the optimization parameter. The control unit provides choice over the adjustable deployment period. The control unit provides proposal for the position of the cooking container. An independent claim is included for a method for operating hob device.
