Abstract (en)

[origin: WO2012128629A1] The invention provides a cleaning composition for cleaning dental objects such as dentures dental braces and/or dentist's tools, comprising lactic acid. The denture cleaning liquids described here were found to provide an improved cleaning effect, which allows for a shorter cleaning time. The cleaning composition is effective against various types of contamination, including smoking and coffee stains, micro-organisms and tartar. The invention also provides a kit and a method for cleaning dental objects.
