Abstract (en)
[origin: WO2012126548A1] The invention relates to an exhaust gas post treatment system for introducing a reducing agent (15) into the exhaust gas stream of an internal combustion engine for the purpose of selective catalytic conversion, wherein the system has a reducing agent tank (1) and a pump (3) for delivering the reducing agent out of the tank (1) to an injection unit, wherein the tank (1) has at least one opening, wherein the pump (3) is designed as an integrated unit (2) and is plugged into the opening in the tank, wherein the integrated unit (2) forms a tank closure and closes the tank in a sealing manner.
