Abstract (en)
[origin: WO2012126703A2] The invention relates to a refrigerating device, in particular a domestic refrigerating device, comprising a device door (1, 3), wherein the door inner wall (15) and the door outer wall (13) that forms the door front delimit a cavity (9) which is filled with heat-insulating foam (11) and which is closed along the edges by a door border strip (17). According to the invention, the door border strip (17) has a recessed grip (19) and is made of two parts consisting of a dimensionally stable main part (21) and a decorative panel (23) that at least partly covers a visible user-side inner face of the recessed grip (19).
