Abstract (en)
[origin: WO2012127155A1] The invention relates to a method of producing a visuo-tactile atlas for the visually impaired representing structured units comprising a plurality of informative elements. The method comprises the steps consisting in: a) - determining the nature of the informative elements to be represented and defining representation rules; b) - selecting on the basis of conventional plates (1) said informative elements to be represented; c) - producing a set of tactile plates (2) according to the rules defined in step a), said objects at least being represented in relief and in colour; d) - producing a set of visual plates (3) corresponding to said tactile plates (2); e) - assembling a first booklet (100), in such a way that the tactile (2) and visual (3) plates of each structured unit are located opposite one another on either side of the binding (4); f) - producing the tactile legends (5) and the visual legends (6), and assembling a second booklet (200) in such a way that the tactile legends (5) and visual legends (6) of each structured unit are located opposite one another on either side of the binding (4). The invention is also aimed at an atlas comprising associated tactile and visual plates, as well as the corresponding legends.
