Abstract (en)
[origin: WO2012127344A1] Disclosed are methods and system for forming atleast a solar module of a plurality of module members. The method
comprises the steps of: positioning atleast a first module member at a predefined position on a holding member; charging electrostatically atleast
any of the first module member and the holding member as to stick to each other at the predefined position; joining atleast the first module member
with atleast a second module member to form atleast part of the solar module.
