Abstract (en)

[origin: WO2012126952A1] The invention relates to a surge arrester comprising a hollow chamber (6) which is formed by at least one insulating body (5) and comprising at least two electrodes (2, 3) which extend into the hollow chamber and the free ends of which are oriented towards each other and are mutually spaced by an electrode gap (A), said electrodes containing multiple different metal materials (2a, 10; 3a, 10) in regions of the free ends.
