Abstract (en)

The present invention relates to a slide type lipstick case structure including: a body (100) having a mounting portion (130) formed on the center thereof, into which a lipstick is mounted; a protection cap (200) coupled to the outer periphery of the body through a triple spiral in such a manner as to be moved up and down by means of rotation manipulations, thereby allowing the lipstick (400) to be extracted out of the body and to be retracted into the body (100); and a cover (300) adapted to open and close the upper portion of the body into which the protection cap (200) is mounted.
