Abstract (en)
[origin: EP2690229A1] The device (1) has mounting frame (2) that is provided with securing unit (4) for securing cistern of sanitary fitting. Cover portions (14,15,26) are provided covering front and upper surface of mounting frame. The mounting frame is bounded by boundary edges (20-22), and shutter element (13) installed at fixed position on bottom floor (6) is provided in gap (33) between boundary edge and building floor. The shutter element is adjusted with respect to mounting frame so that the mounting device is arranged at different heights. An independent claim is included for a method for assembling of device used for mounting sanitary fitting.
