Abstract (en)  
[origin: EP2690381A1] The battery (107) has a tubular wall that is provided to form an inner space with a closed end of a tube (103), and an open and closable end of the tube for insertion of an insert. The two overflow openings are provided for fluid communication of the interior of the header with an interior of the manifold. The battery is formed from a flow pressed portion. The overflow openings are formed in the lateral approach (110,111). The lateral projection is provided with a concave portion which serves for engagement with an adjacent manifold.
