Abstract (en)

A terminal and handwriting sharing method thereof are disclosed, by which a handwriting input is shared between the terminal and an external terminal. The present invention includes a touchscreen configured to receive a first touch input and/or to display a trace of a second touch input, a wireless communication unit configured to communicate with an external terminal via a wireless network, and a controller to control a trace of the second touch input to be displayed on the touchscreen or the external terminal based on the first touch input to the touchscreen.
