Abstract (en)

[origin: EP2690601A2] The second vehicle (20) is made to automatically generate a control information representative of driving of vehicle on road (30) and to take the picture of first vehicle (10). The text data of vehicle registration plate of the first vehicle is used to determine vehicle identifier associated with a vehicle apparatus (100). The toll information of vehicle device and control information of second vehicle are compared with text data of registration plate. During failure of comparison process, the text data of vehicle license number of the first vehicle is determined. Independent claims are included for the following: (1) a central controller of toll system; (2) a decentralized controller of vehicle; and (3) a toll system.
