Abstract (en)

[origin: CA2830651A1] The invention relates to a gluing nozzle (1) for introducing glue material into a gluing gap (13) and to a method for introducing glue material into a gluing gap (13). The gluing nozzle (1) has a first outlet channel (3A) and a first outlet opening (3) which is arranged on an end side (2) of the gluing nozzle (1). In addition, the gluing nozzle (1) has at least one second outlet channel (4A) with a second outlet opening (4), wherein the at least two outlet openings (3, 4) are arranged in a direction of movement (B) of the gluing nozzle (1) in such a manner that the glue material emerging from an outlet opening (3, 4) causes compression of the glue material emerging from at least one other outlet opening (3, 4).
