Abstract (en)
[origin: WO2012131401A1] A cartridge recycling system comprises a transparent adhesive pocket for affixing to a cartridge pack and a sealable recycling bag for receiving a spent cartridge. The recycling bag comprises a foldable envelope for insertion in the pocket, the envelope being pre-printed with a mailing address and one or more customer messages such that one said message is visible through the front face of the pocket when the bag is folded and inserted therein. The envelope may carry a machine readable code to enable recycling facilities to monitor the volume of cartridges being recycled from a particular source.
