Abstract (en)

[origin: WO2012131205A1] The invention relates to packaging for packaging a first fluid and a second fluid, the second fluid being separated from the first, wherein the packaging has a first part for packaging a first fluid and a second part for packaging a second fluid, wherein the first part and the second part are designed to move from a first position, in which the first part and the second part are separated, to a second position allowing the first fluid and the second fluid to mix.
