Abstract (en)

[origin: WO2012135574A2] The present invention relates to systems and methods for providing steam to a gas recovery unit (130) based on changes to steam flow to and/or power generated by a power generation unit (119). The gas recovery unit (130) may part of a thermal power generation unit (100) and may be an amine based CO2 recovery unit including two or more regenerator columns (153).
