Abstract (en)

[origin: US2012255033A1] The claimed subject matter provides a method for licensing software in a computing environment. An exemplary method includes initiating application software program on a computer system having a plurality of authorized users, one of the authorized users having a single-user license to use the software program. An identity of a current user of the computer system is checked. Operation of the software program is prohibited if the current user is one of the plurality of authorized users other than the user who is granted the single-user license.
