Abstract (en)  
[origin: WO2012131563A1] The invention relates to a domestic appliance device, in particular a cooking device, comprising at least one power module (18), at least two consumer units (20, 22, 24, 26) and at least one control unit (34). The aim of the invention is to improve the ease of use. As a result, in at least one operational mode in which at least two of the consumer units (20, 22, 24, 26) are supplied together by the power module (18) and in which the amount of power requested for the consumer units (20, 22, 24, 26) exceeds the available power of the power module (18), the control unit (34) is designed to distribute at least one part of the available power between the consumer units (20, 22, 24, 26 ) in accordance with at least one operational characteristic.
