Abstract (en)

[origin: EP2692263A2] A walking stick chair includes a main stick (1), a seat unit (2), a support unit (4), and a linking unit (5). The seat unit (2) includes an upper slider member (21) connected to the main stick (1) and movable between first and second positions, and a seat member (22) connected to the upper slider member (21). The support unit (4) is connected to the main stick (1). The linking unit (5) is connected to the support unit (4) and the seat unit (2). The walking stick chair is at an unfolded state when the upper slider member (21) is at the second position, and is converted from the unfolded state to a folded state when the upper slider member (21) moves from the second position to the first position.
