Abstract (en)

A process is described for producing layers of human hair to be used in aesthetic compositions; such process comprises the steps of: preparing a gluing solution in a vaporizer; prearranging an amount of cut, washed and dried human hair; placing on an hot press at least one first supporting sheet; arranging the human hair on the first supporting sheet; homogeneously spraying the gluing solution onto human hair; covering the glued human hair with at least one second supporting sheet; pressing for a first time in the hot press the supporting sheets with the inserted human hair; overturning the supporting sheets with the inserted human hair; lifting the second supporting sheet and homogeneously spraying the gluing solution onto the human hair; covering the glued human hair with the first supporting sheet; pressing for a second time in the hot press the supporting sheets with the inserted human hair; resting the supporting sheets with the inserted human hair; and removing the supporting sheets, obtaining the layer of human hair.
