Abstract (en)

[origin: EP2692607A1] The gear has a pair of wheels (2, 3) facing transverse to a travel direction and driven by motors (4, 5), which are transverse to the travel direction, where each motor comprises a rotor. A mechanical releasable connection (20) is arranged between the wheels. The mechanical releasable connection has mechanical interruptible wheel set axles, a wheel set shaft or a mechanical interruptible carrier. The connection interconnects the rotors of the motors and comprises two connectors connected with a clutch (21).
